

The Testimonials

After reading the testimonials – “The sound quality is great, yet they’re the size of a proton!” and “These hearing aids are truly undetectable!” and “They’re so tiny that sometimes even *I* forget I’m wearing ‘em!” – Brad overcame his initial skepticism and mail-ordered a pair of Dinklaker’s Invisible Ear Canal Amplifiers. A week later, when he opened the box and put on the amplifiers, he felt that the advertisement had played a bit too fast and loose with the truth, so he wrote a nastygram to Dinklaker Products. But then, while rooting around in his fridge for a toothsome morsel, he serendipitously stumbled upon a really big proton in the crispier – compelling him to eat both his words *and* the proton.
